1. Users

You must define an Organization Administer Role to manage users in Organizations.

Ogranization Administer have access to

- Manage User

    a. Invite User

    b. Creat User

    c. Edit User

    d. Enable/disable User

    e. Delete User

        i. Delete User from Organization

        ii. Delete User from Group in Organization

- Manage User Roles
- Manage User Permissions

When you delete a user from your Organizations, All the user's roles and permissions are romeved. When deleting from a groups, all user's roles and permissions for only selected grups are romeved.

An Organization Administer can only manage users in his own Organizations.

User name must be unique.

Organization Administer can add User in 2 ways: * Cy creating User directly * By inviting to Organization

If Organization Administer choose to add User direcly without invitation from inside Abyss Platform, just fills the required user informations and select a role for user and complete adding.

If you as an Organization Administer choose the option to add a user by intivation, you also need to select a role to assign to User. Invited User sees the invitation mail in his mailbox. If clicks the link, system directs User to signup page of Abyss.
